PROFESSIONAL SUMMARY

Data Analyst with hands-on experience delivering end-to-end analytics solutions – from SQL-based risk scoring and price elasticity modelling on 1M+ transactions, to interactive Power BI dashboards that translate findings into business decisions. Self-directed project work has quantified \$1.7M+ in revenue at risk, validated discount strategies with A/B testing ($p < 0.001$), and produced actionable retention recommendations with 300%+ ROI. Open to full-time Data Analyst roles and Data Analyst internship opportunities.

EDUCATION

B.Tech CSE – Cybersecurity | Vignan's Institute of Information Technology
CGPA: 8.77 / 10.0

2023 – 2027

PROJECTS

Customer Churn Analysis & Revenue Impact Simulator | Python . SQL . Power BI
https://github.com/Sasikumar-19/Customer_Churn_Analysis_Revenue_Impact_Simulator
Live Demo: <https://customer-churn-analysis-929.streamlit.app/>

- Engineered a SQL rule-based risk scoring model across 7,032 telecom customer records, classifying accounts into High / Medium / Low churn tiers – validated against actual churn rates (High Risk tier: 55-65% confirmed churn).
- Quantified \$1.7M+ in annual revenue already lost and identified \$23,390+/month in recoverable revenue from ~1300 active high-risk customers.
- Calculated 300%+ ROI on a targeted \$10/customer retention intervention; packaged findings in a Power BI dashboard with live contract-type slicer for retention team use.

Pricing & Discount Optimization Analysis | Python . SQL . Power BI . scipy.stats
<https://github.com/Sasikumar-19/Pricing-Discount-Optimization-Analysis>

- Analysed 1M+ retail transactions to model price elasticity across 322 product categories – identifying 281 elastic categories (discount-responsive) and 5 inelastic categories where discounting destroys margin.
- Found that discounts beyond 2.8% threshold turn margin negative; A/B tested recommended discount tiers achieving statistical significance ($p < 0.001$, Cohen's $d = 0.77$ – medium effect).
- Delivered a per-category optimal discount table to the commercial team via Power BI report, enabling data-driven pricing decisions across the product catalogue.

INTERNSHIP

Data Analytics Intern | ApexPlanet Software Pvt. Ltd.

| Feb 2026 – Apr 2026

- Applied Data analytics techniques to analyse business datasets and generate actionable insights.
- Performed exploratory data analysis, built interactive dashboards, and conducted statistical testing using Python, SQL, and Power BI across multiple real – world datasets.
- Delivered insights on retail sales trends, e-commerce performance, and landing page experiments while completing end-to-end analytics tasks including EDA, Dashboards, and A/B testing.

CORE COMPETENCIES

- Data & Advanced Analytics:** Predictive Modelling, Statistical Validation, EDA, Behavioural Pattern Analysis.
- Technical Skills:** SQL (MySQL/SQLite), Python (Pandas, Seaborn, SciPy, Matplotlib), Power BI, Advanced Excel.
- Business Skills:** Hypothesis Testing (A/B), Data Storytelling, KPI Dashboarding, Root Cause Analysis.

CERTIFICATION - Deloitte Data Analytics Certificate
