CAREER OBJECTIVE

Aspiring student to become a Data Analyst . Currently learning data analysis concepts, Python, SQL, and seeking a Data Analyst Intern opportunity to gain hands-on exposure, strengthen analytical skills, and build a strong foundation in data-driven decision making.

EDUCATION

Qualifications	Institute / University	Year	Performance
B – Tech CSE (Cyber Security)	Vignan’s Institute of Information Technology	2023 – 2027	Current CGPA : 8.71
Intermediate – MPC	SR Junior College	2021 – 2023	Percentage : 94.6%
SSC (Class X)	Ravindra Bharathi School	2021	Percentage : 100%

INTERNSHIPS

Data Analytics Intern

ApexPlanet Software Pvt.Ltd

| Feb 2026 – Apr 2026

- Apply Data analytics technique to analyze business datasets and generate actionable insights.
- Performed exploratory data analysis, built interactive dashboards, and conducted statistical testing using Python, SQL, and Power BI across multiple real – world datasets.
- Delivered insights on retail sales trends, e-commerce performance, and landing page experiments while completing end-to-end analytics tasks including EDA, Dashboards, and A/B testing.

Artificial Intelligence & Machine Learning Trainee

AICTE – Edunet Foundation

| Jun 2025 – Jul 2025

- Gain practical exposure to machine learning and data analysis workflows using real-world datasets.
- Performed data cleaning, preprocessing, and EDA using Python libraries such as Pandas and NumPy.
- Developed foundational understanding of the complete data analytics workflow and machine learning concepts.

PROJECTS

Exploratory Data Analysis & Business Intelligence – Walmart Retail Sales Dataset

- Analyze retail sales data to identify seasonal patterns, store performances, and factors affecting weekly sales.
- Performed EDA using Python and SQL, conducted multivariate analysis, and created visualizations using Matplotlib and Seaborn.
- Identified key sales trends including holiday sales spikes, high-performing stores, and factors influencing weekly revenue.

Tools Used : Python, SQL, Matplotlib, Seaborn

Github : <https://github.com/Sasikumar-19/Task2--EDA-BusinessIntelligence>

Deep – Dive Analysis & Interactive Dashboard – Olist E-Commerce Dataset

- Analyze e-commerce transactions to understand customer behaviour, product performance, and revenue trends.
- Merged multiple datasets to create a master dataset, defined KPIs, and built an interactive Power BI dashboards to visualize business metrics.
- Delivered Insights on revenue distribution, product category performance, and geographic sales patterns.

Tools : Python, Pandas, Power BI

Github : <https://github.com/Sasikumar-19/Task-3-DeepDiveAnalysis-Interactive-Dashboard/tree/main>

A/B Testing & Statistical Validation – Landing Page Experiment

- Evaluate whether a new landing page design improves user conversion rates.
- Performing conversion rate analysis between control and treatment groups and applied a Z-test for proportions.
- Determined that the conversion rate difference was not statistically significant and provided a data – driven recommendation.

Tools : Python, Pandas, Statistical Testing.

Github : <https://github.com/Sasikumar-19/Task-4--Data-Storytelling-Statistical-validation-sasi/tree/main>

CERTIFICATION

- Oracle Certified Associate – MySQL Heatwave Implementation
- Aviatrix Certified Engineer – Multicloud Network Associate

TECHNICAL SKILLS

Programming : Python, SQL

Libraries : Pandas, NumPy

Data Visualization : Matplotlib, Seaborn, Power BI

Tools : Jupyter Notebook, Github

Techniques : Data cleaning & Preprocessing | EDA | KPI Development | A/B Testing | Data Storytelling
